A full archive of the Museum’s lecture podcasts. These are continuously updated, so please check back, sign up to our rss feed or join our e-mailing list for notification of new podcasts.

**Dr Neil Todd**  
**Moseley and Manchester Science**

Henry Moseley moved from Oxford to Manchester in 1910, leaving behind a small scientific community tied to the traditions of college life. He joined the dynamic research team around Ernest Rutherford and quickly reached the forefront of contemporary physics. Dr Neil Todd (University of Manchester) illuminates Moseley’s life and work in Manchester, and his rapid transformation from student to leading researcher. Part of our ‘Dear Harry...’ exhibition programme.

**Professor Myles Allen**  
**Who’s to Blame for the Weather?**

Professor Allen of the Oxford University Environmental Change Institute discusses one of the most pressing issues of the modern day. This lecture lasts for 1 hour, 7 minutes and 20 seconds.

/wp-content/uploads/Whos-to-Blame-for-the-Weather.mp3
Russell Foster explains the role of light in regulating our bodies and discusses the implications of today’s almost constant exposure to light. This lecture lasts for 1 hour, 7 minutes and 20 seconds.

/wp-content/uploads/Body-Clocks-Sleep-and-Light.mp3

Leigh Fletcher (Dept. of Atmospheric, Oceanic and Planetary Physics, University of Oxford) talks about current research on the weather of other planets. This lecture lasts for 55 minutes and 58 seconds.

/wp-content/uploads/Dr-Leigh-Fletcher-Stormy-Weather-lecture.mp3

Writer Richard Hamblyn revisits his first book about the 19th-century amateur meteorologist Luke Howard who gave the clouds the names we use today. This lecture lasts for 57 minutes and 39 seconds.

In an evening event on Thursday 25 October 2012, the deep connections between science and poetry were explored in a talk by Dr John Holmes (University of Reading) and readings by poet Lesley Saunders (Two Rivers Press).

Lesley Saunders reading from her new collection, Cloud Camera.

Dr John Holmes talking about poetry and science.
Professor Jim Bennett
Thoughts and Things: the role of craft in 16th-century astronomy and cosmography

Professor Jim Bennett talks about the craft and workmanship of scientific workshops and print-shops in the 16th Century. This lecture lasts for 51 minutes and 35 seconds.

/G-content/uploads/Thoughts-and-Things.mp3

Nicholas Crane
Mercator: The Man who Mapped the Planet

Nicholas Crane, geographer, explorer, writer and broadcaster Nicholas Crane talks about the inspirations behind his book on Gerard Mercator. This lecture lasts for 1 hour and 8 minutes.

/G-content/uploads/Nicholas-Crane-at-MHS.mp3

Dr Efstathios Arapostathis
Owning and Disowning Wireless: Inventions, Experts and the Law Courts, 1890-1930

Dr Efstathios Arapostathis, University of Athens, gives the Douglas Byrne Marconi Lecture 2012. This lecture lasts for 1 hour and 8 minutes.

/G-content/uploads/Owning-and-Disowning-Wireless.mp3

Dr Matthew Shaw
Decimalising Time: Calendar and Clocks in the French Revolution

Dr Matthew Shaw, British Library, talks about The extraordinary revisions of time measurement adopted in the French Revolution. This lecture lasts for 56 minutes.

/G-content/uploads/DecimalisingTime.mp3

David Rooney
Selling Time: Science, Commerce and Dirty Tricks in the Distribution of Greenwich Mean...
Time

David Rooney, Curator of Transport at the Science Museum, London, talks about how Greenwich Mean Time was distributed and tells the curious story of Ruth Belville, the Greenwich Time Lady. This lecture lasts for 59 minutes.

Professor Ian Walmsley

Ultrafast Physics: Past, Present, Future

Ian Walmsley is Hooke Professor of Experimental Physics at the University of Oxford. In a public lecture at the Museum, he presented the shifting research frontier of extremely short-duration physics, where time is measured in femtoseconds and attoseconds. This lecture lasts for 43 minutes.

/wp-content/uploads/Ian-Walmsley.mp3

Dr Inga Elmqvist

A Portrait of Hevelius

Inga Elmqvist talks about the Polish astronomer Johannes Hevelius and his use of art in his publications. This lecture lasts for 42 minutes.

/wp-content/uploads/Hevelius.mp3

Michael Wright

The Eccentric Turner

The fourth in a series of public lectures linked to the Museum’s ‘Eccentricity’ exhibition. This lecture lasts for 1 hour and 3 minutes.

/wp-content/uploads/The-Eccentric-Turner.mp3

Dr Lauren Kassell

Simon Forman: astrology, Medicine and Quackery in Elizabethan England

The third in a series of public lectures linked to the Museum’s ‘Eccentricity’ exhibition. View a pdf of the lecture slides here. This lecture lasts for 54 minutes.
Dr Vicky Carroll

*From Alligator Wrestling to Fossil Skeletons: Scientific Eccentricity in the Early 19th Century*

The second in a series of public lectures linked to the Museum’s ‘Eccentricity’ exhibition. This lecture lasts for 48 minutes.

Dr Brian Regal

*Crackpots and Eggheads: Eccentricity in Natural History*

The first in a series of public lectures linked to the Museum’s ‘Eccentricity’ exhibition. This lecture lasts for 50 minutes and 18 seconds.

Dr Silke Ackermann

*Astrolabes in Cultural Context*

The third in a series of public lectures linked to the Museum’s ‘Al-Mizan’ exhibition. This lecture lasts for 52 minutes and 11 seconds.

Professor Emilie Savage Smith

*Mapping the Earth in Medieval Islam*

The first of a public lecture series linked to the Museum’s ‘Al-Mizan’ exhibition. This lecture lasts for 55 minutes and 28 seconds.
Dr Venetia Porter
The Power of the Word - Amulets in Islam

The second in a series of public lectures linked to the Museum’s ‘Al-Mizan’ exhibition. This lecture lasts for 43 minutes.

/wp-content/uploads/Amulets-in-Islam-lecture.mp3

Professor Monica Grady
Meteorites in Science and Culture

A public lecture linked to the Museum’s ‘Anvilled Stars’ exhibition. This lecture lasts for 53 minutes and 7 seconds.

/wp-content/uploads/MeteoritesInScienceAndCulture.mp3

Dr Anna Marie Roos
The Oxford Philosophical Society and the Royal Society: a meeting of minds?

Part of the Museum’s celebration of the 350th anniversary of the Royal Society. This lecture lasts for 41 minutes.

/wp-content/uploads/RoyalSocietyLecture-Roos.mp3

Pleasures and Sorrows: The Photographer

Photographer Richard Baker talks about his experience documenting the travels of philosopher Alain de Botton. This excerpt lasts for 3 minutes and 40 seconds.

/wp-content/uploads/PSPhotographerLecturePodcast.mp3

Professor Michael Hunter, FBA
The Great Experiment: the Early Evolution of the Royal Society
Part of the Museum’s celebration of the 350th anniversary of the Royal Society. This excerpt lasts for 3 minutes and 40 seconds.

Dr William Poole
Oxford and the Royal Society in the Seventeenth Century.

Part of the Museum’s celebration of the 350th anniversary of the Royal Society. This lecture lasts for 41 minutes.

Professor Alan Watson
the Pierre Auger Observatory

From a series of lectures about some of the major developments in telescopes in the modern era. This lecture lasts for 1 hour and 9 minutes.

Professor Roger Davies
the Gemini Telescopes

From a series of lectures about some of the major developments in telescopes in the modern era. This lecture lasts for 1 hour and 2 minutes.

Professor Phil Diamond
Jodrell Bank, the Lovell Telescope and e-MERLIN

From a series of lectures about some of the major developments in telescopes in the modern era. This lecture lasts for 1 hour and 11 minutes.
Professor Alexander Boksenberg
the William Herschel and the Hubble Telescopes

From a series of lectures about some of the major developments in telescopes in the modern era. This lecture lasts for 1 hour and 20 minutes.
