- October 2011
- ISBN 978 90 04 21150 6
- *Hardback*  
(approx. 288 pp. (16 color illustrations))
- List price EUR 99.- / US\$ 136.-
- History of Science and Medicine Library; 23/2

The volume forms a part of the celebrations marking the anniversary of the invention of the telescope. From its Renaissance beginnings to yesterday's Cold War, the essays contributed here throw a spotlight on a number of significant episodes in the continuing adventures of this well-loved instrument, which has played a crucial role in Man's thinking about his position – literally and philosophically – in the universe. Drawn from various conferences held by the Scientific Instrument Commission of the International Union of the History and

Philosophy of Science between 2007 and 2009, these papers make a substantial contribution to our current knowledge about this fascinating optical instrument.

**Readership:** All those interested in the history of science and technology, the history of scientific instruments, the history of astronomy from the 17th to the 20th centuries, and institutional and social history.

**Alison D. Morrison-Low, D.Phil. (2000)** in Economic History with Physics, University of York, Principal Curator of Science at National Museums Scotland since 1980. Her recent publications explore the English instrument trade, for which she won the 2008 Paul Bunge Prize.

**Sven Dupré, Ph.D. (2002)** in Philosophy, Ghent University, is Research Group Director at the Max Planck Institute for the History of Science and Professor of History of Knowledge at the Free University of Berlin. His recent publications focus on the history of optics and the telescope.

**Stephen Johnston, Ph.D. (1994)** in History of Science, University of Cambridge, is Assistant Keeper at the Museum of the History of Science, University of Oxford. His publications focus on instruments and practical mathematics from the 16th to the 19th centuries.

**Giorgio Strano, Ph.D. (2003)** in History of Science, University of Florence, is Curator of the Collections at Museo Galileo in Florence. He has published extensively on the history of astronomy, including "Galileo's Telescope" (2008).
